

# Megaman – Poplar Garden Centre

Megaman's Dino modern linear luminaires have been used within a new retail space at Poplar Garden Centre, Marks Tey, Essex. Ideal for internal or external installations, the Dino fitting offers a long life with low maintenance making it the perfect luminaire to T5 and T8 fluorescent luminaires.

### Lamps Used

Dino Integrated LED Batten

Poplar Nursery is currently run by the third generation of the same family who started the business in 1938. The nursery has expanded over the years and now includes a farm shop and deli, restaurant, miniature railway and the latest addition this year, a new shop floor area for BBQ's and patio furniture incorporating the Dino fittings. Installed by AD Mitchell Electrical Contractors Ltd, Colchester, the Dino linear luminaires fit the new retail area perfectly as the fittings blend into the ceiling space but offer excellent wide light distribution and high uniformity at 70% lumen at 50,000 hours. Due to their flexibility, the Dino fittings were also fitted in two general storage areas and a food cold store at the nursery.

Dino is available in 19.5W, 22.5W, 35W, 46W, 63W and 70W variations, the fitting has a UV resistant and corrosion proof casing making it suitable for harsh environments with an IP66 protection against water and dust and is IK08 vandal resistant. Dino also comes with Megaman's 3-year warranty.
