The Farmers Club Reap the Rewards of Energy Saving with Megaman Lamps

Energy saving lighting specialists Megaman UK has supplied, through Medlocks Electrical Distributors, its IncandaLEDs candles as part of a refurbishment at The Farmers Club, London. Megaman's lamps were the preferred choice due to excellent lux level and appearance as they complemented the existing fixtures within the building.

Lamps Used

IncandaLED Range

The Farmers Club situated in Whitehall Court was founded in 1842 and is an exclusive Private Members Club solely for those involved in farming, agriculture or related industries. Whitehall Court offers members 56 bedrooms, 6 function rooms, a Bar, Lounge and Restaurant with Megaman's lamps being used throughout.

Megaman's IncandaLED's deliver harmonious illumination with a sparkling light effect and the benefit of high colour temperature and excellent colour rendering. It is dimmable to allow the user to create the desired ambience and is perfect for a wide range of applications such as bedrooms, restaurants, spas, hotels and bakeries. Incanda-LED is available in a variety of lamp base fittings: E14, E27, B15 and B22 and offers 50,000 hours life.

Greg Barthelmy, Maintenance Manager at The Farmers Club, commented "I have been replacing lamps since 2006, converting incandescent 40/100 watt to CFL 7/9 watt type approximately 8-10 lamps per room @ 56 rooms. The first set of lamps exchanged showed before = 39734 watts @ 8 hours to 14561 watts @ 8 hours. This was good on cost but light quality poor and slow to come on causing unhappiness amongst the membership. Having tried several types of lamps, the new 5 watt Megaman lamps have given us quality light with even more savings - at present approximately 82500 watts"
